

# didicar®

didicar is a unique self propelled ride on toy for children (however adults can ride it too!!).

didicar is safe and ideal to use indoors or outdoors on any hard, smooth and flat surface. didicar provides exercise in any setting and promotes physical development as well as balance, co-ordination, spacial and speed awareness.

didicar provides all the above, but above all else it's just plain FUN!!

Available in Red, Blue, Pink, Purple and Yellow.

Don't forget to check out the didicar stickers and other didicar accessories at didicar's toyshop.

didicar conforms to European Safety Standard EN 71 Pts 1,2 3 for toys.

Riders from 3 years to, well there is no upper limit, will have years of fun on the only ride on toy for children that both the child and the parents can have fun on at the same time at the same level.

Simply turning the wheel left and right moves the didicar, no need for pedals (or feet for that matter), motors, batteries or greasy chains. It's a magical mystery car that fuels the imagination while helping children keep fit and having fun.

didicar is easy to lift, carry and store weighing only 3.8Kg. However it is robust enough to take up to 120Kg load and cope with the most enthusiastic of riders. It is compact, has no sharp edges and has no running expenses other than the child's effort and energy.

***Beware of imitations - if it doesn't say didicar it's not a didicar!***
